Contemporary colors and surfaces.

Considered a peer of the finest marbles, travertine is actually a stone. This dual marble-stone identity is expressed in Marvel Travertine in the two variants of Vein Cut and Cross Cut. The Vein Cut reproduces the striped appearance typical of travertine, while the Cross Cut shows off its rich colors with a stone-look surface characterized by extensive shading.

Ricordato al pari dei marmi più pregiati, il travertino è in realtà una pietra. Questa duplice identità marmo-pietra si esprime in Marvel Travertine nelle due varianti Vein Cut e Cross Cut. Il taglio Vein Cut riproduce il tipico aspetto striato del travertino, mentre il taglio Cross Cut ne valorizza la ricchezza cromatica con una superficie dall'aspetto pietra caratterizzata da sfumature estese.

Reconnu au même titre que les plus beaux marbres, le travertin est en fait une pierre. Cette double identité de la pierre marbrière est exprimée dans le Marvel Travertine dans les deux variantes Vein Cut et Cross Cut. La coupe Vein Cut reproduit l'aspect strié typique du travertin, tandis que la coupe Cross Cut renforce sa richesse chromatique avec une surface d'aspect pierreux caractérisée par des ombres étendues.

Travertin ist ein Stein, der den feinsten Marmorarten in nichts nachsteht. Diese doppelte Identität Marmor/Stein kommt in Marvel Travertine in den beiden Varianten Vein Cut und Cross Cut zum Ausdruck. Der Schliff Vein Cut bringt das typische gestreifte Erscheinungsbild von Travertin hervor, während der Schliff Cross Cut den Farbreichtum mit einer steinähnlichen Oberfläche, die sich durch starke Schattierungen auszeichnet, hervorhebt.

El travertino goza del mismo reconocimiento que los mármoles más finos, pero en realidad es una piedra. Esta piedra de mármol de doble identidad se expresa en Marvel Travertine en las dos variantes Vein Cut y Cross Cut. El corte Vein Cut reproduce el típico aspecto estriado del travertino, mientras que el corte Cross Cut realza su riqueza cromática con una superficie de aspecto piedra caracterizada por un amplio sombreado.

Травертин напоминает мрамор, но на самом деле является камнем. Эта двойная натура, мрамора и камня, отражается в Marvel Travertine в двух вариантах рисунка распила: Vein Cut и Cross Cut. Распил Vein Cut передает характерный полосатый облик травертина, а Cross Cut имеет богатую пятнистую окраску с обширными оттенками.

The constant research of Atlas Concorde Laboratories has led to the creation of Sensitech, the porcelain tile surface made using a production method patented in Italy. Sensitech is a high-tech surface for interiors that combines high slip resistance with an unrivaled soft touch, which also makes it resistant to dirt and easier to clean. With Sensitech the meaning of surface evolves and takes on a reassuring, protective, and pleasantly refined touch, making architectural spaces increasingly comfortable and appealing.

La recherche constante des Laboratoires Atlas Concorde a créé Sensitech, la surface en grès cérame pour intérieur réalisée avec un procédé de fabrication breveté en Italie. Une surface à haut coefficient technologique pour les espaces intérieurs, en mesure de conjuguer de hautes performances de résistance à la glissance avec une douceur tactile inédite, qui la rend également résistante aux salissures et plus facile à nettoyer. Avec Sensitech, c'est l'acception même d'une surface qui évolue en offrant une caractéristique rassurante, protectrice et agréablement raffinée, qui rend les espaces architecturaux de plus en plus confortables et agréables à vivre.

De la constante investigación de los Laboratorios Atlas Concorde nace Sensitech, la superficie de gres porcelánico para interiores realizada con un método de producción patentado en Italia. Una superficie de alto coeficiente tecnológico capaz de combinar un alto rendimiento de resistencia al deslizamiento con una suavidad táctil sin precedentes, que además la vuelve resistente a la suciedad y más fácil de limpiar. Con Sensitech, el significado de la superficie evoluciona y adquiere un toque tranquilizador, protector y agradablemente refinado, haciendo que los espacios arquitectónicos sean cada vez más cómodos y satisfactorios.

Dalla costante ricerca dei Laboratori Atlas Concorde nasce Sensitech, la superficie in gres porcellanato realizzata con metodo produttivo brevettato in Italia. Una superficie ad alto coefficiente tecnologico per gli ambienti interni, in grado di coniugare elevate prestazioni di resistenza allo scivolamento ad un'inedita morbidezza tattile, che la rende anche resistente allo sporco e più facile da pulire. Con Sensitech il significato di superficie si evolve e assume un tocco rassicurante, protettivo e piacevolmente raffinato, rendendo gli spazi architettonici sempre più confortevoli ed appaganti.

Durch kontinuierliche Forschung der Atlas Concorde Laboratorien entsteht Sensitech, die Feinsteinzeugoberfläche, die mit einem in Italien patentierten Herstellungsverfahren produziert wird. Eine Hightec-Oberfläche für Innenräume, die hohe Rutschfestigkeit mit unerwartet weicher Haptik verbindet, welche sie auch schmutzunempfindlicher und reinigungsfreundlicher macht. Mit Sensitech erreicht die Oberfläche ein ganz neues Niveau in Sachen Zuverlässigkeit, Schutz und Schönheit. Und macht damit unsere Räumlichkeiten noch attraktiver und komfortabler.

В результате исследований, выполненных в лабораториях Atlas Concorde, появилась керамогранитная поверхность Sensitech. Новая поверхность с высокими техническими показателями для интерьеров, которая сочетает отличное сопротивление скольжению и удивительную мягкость на ощупь, устойчива к загрязнениям и крайне проста в чистке и уходе. Поверхность Sensitech – на новом витке технической эволюции, она безопасна, приятна, изысканна и делает пространства уютнее и удобнее.
